Description: Carbon element (and pre-filter)

Types: ALL CARBON ELEMENTS

- \* Condensate treatment is an important element of any compressed air system. the carbon elements produced by JORC comply with strict environmental requirements.
- \* Providing minimum maintenance is carried out, the performance of the carbon elements will typically achieve an output of < 20 ppm.
- \* The carbon elements contain specially selected carbon to ensure compressor condensate can be separated.
- \* The carbon element bags are carefully tested and checked on dimensional and strength aspects.
- \* The carbon elements are totally recyclable.
- \* The fibres used in the pre-filters is produced from polypropylene.
- \* The carbon elements help you comply with ISO14001 regulations.

Heerlen, 28 June 2013

JORC Industrial BV

Mr. de Bie  
Managing Director
