Description: Condensate separating system

Types: **SEPREMIUM**

- * Condensate treatment is an important element of any compressed air system. The SEPREMIUM oil/water separator complies with strict environmental requirements.
- * The SEPREMIUM uses a proven and well-developed system which does not depend on complicated climate zone calculations or a complicated selection criteria.
- * Providing minimum maintenance is carried out, the performance of the SEPREMIUM will typically achieve an output of < 10 ppm.
- * The SEPREMIUM does not have large settling tanks or reservoirs that hold the condensate for long periods and which can encourage harmful bacteria growth.
- * The SEPREMIUM units are carefully tested on water tightness.
- * The SEPREMIUM is totally recyclable.
- * The SEPREMIUM range of oil/water separators helps you comply with ISO14001 regulations.
